[LinkedIn](#) · [Github](#)

Results-driven Web Developer with strong expertise in backend development using PHP and Laravel, and hands-on experience in building scalable APIs, admin dashboards (Blade & Filament), and database-driven applications. Skilled in frontend technologies such as JavaScript, HTML5, CSS3, and Bootstrap, enabling the delivery of seamless end-to-end web solutions. Adept at deploying and optimizing applications on cPanel, integrating search, export (Excel/CSV), and multilingual support (including RTL/Arabic). Experienced in system architecture, role-based access control (Spatie Permissions), and developing custom automation features to enhance business workflows. Passionate about delivering clean, maintainable code and creating solutions that balance performance, usability, and scalability.

EXPERIENCE

FREELANCE WEB DEVELOPER

- Managed and completed multiple freelance web development projects, collaborating directly with clients to define project scopes, requirements, and deliverables.
- Developed custom web applications, resulting in tailored solutions for client needs.
- Developed custom web applications, resulting in tailored solutions for client needs.

LARAVEL DEVELOPER, [MACHINFY](#) (APRIL 2024 - PRESENT) PART TIME

- Developed both frontend and backend for the company and administrative panels.
- Created a CRM system for employees, accountants, sales, admins, and the owner with specific roles and permissions for each user group.
- Debugged complex software issues, leading to a more stable product release.
- Reduced development time by creating reusable code libraries for future projects.
- Updated old code bases to modern development standards, improving functionality.

PHP LARAVEL DEVELOPER, [LOGIC DESIGN COMPANY](#) (MAY 2022 - PRESENT)

- Led the development of various web projects, including [Mongizz](#), [Doctor](#), [Caffitaly](#), and [Medineeds](#), [Arab Contractors](#) ensuring high performance and scalability.
- Collaborated with cross-functional teams to translate project requirements into functional web applications.
- Implemented best practices in web development, resulting in improved project quality and client satisfaction.
- Participated in software field testing to verify performance of developed projects.

- Work in many Admin panels for company with blade and Filament

FULL-STACK DEVELOPER, [UDACITY](#) (MAY 2021 - OCT 2021)

- DEVELOPED WEB APPLICATION PROJECTS USING HTML, CSS, JAVASCRIPT, PYTHON, AND FLASK FRAMEWORK.
- BUILT 5 PROJECTS, LEARNING ABOUT HTTP, APIS, CORS, AND POSTGRES. ([SELECTED PROJECTS](#))

DATA SCIENCE ENGINEER INTERN, [EGYPTIAN SPACE AGENCY \(EGSA\)](#) (AUG 2020 - NOV 2020)

- Built a Machine Learning model to predict satellite telemetry data, improving prediction accuracy by 15%.
- Developed an image processing project for NASA cloud images to identify cloud formations and contribute to climate research.

WEB DEVELOPMENT SUMMER TRAINING, [CEIT](#) (MAY 2019 - OCT 2020)

- Developed a web application project for an E-commerce website using HTML, CSS, JavaScript, php and Laravel.

EDUCATION

B.S. IN COMPUTER SCIENCE AND PURE MATHEMATICS, FACULTY OF SCIENCE, AL-AZHAR UNIVERSITY (MAY 2021)

- Relevant coursework: Discrete mathematics, Cryptography, Graph theory, Introduction to Computer Science, Object-Oriented Programming (OOP), Data Structures, Algorithms, Computer Architecture, Database Systems, Operating Systems, Artificial Intelligence, System Analysis & Design.

SKILLS

- | | | |
|---------------|------------------------|-------------------------|
| • Laravel | • API integration | • Front-end development |
| • PHP | • RESTful apis | • Databases |
| • Programming | • Testing frameworks | • Agile workflow |
| • Filament | • Back end development | • Code version control |

ACTIVITIES

- Fourteenth place in Al-Azhar University Collegiate Programming Contest in AAST.
